

SILICON VALLEY
INNOVATION CENTER

THE PRACTICAL GUIDE TO DIGITAL TRANSFORMATION FROM SILICON VALLEY

DEEP DIVE IN THE SILICON VALLEY

The current innovation pace can be difficult for incumbents to analyze and keep up. Every day, hundreds of startups burning through billions of VC funds are trying to disrupt every industry and increase their market share. That is why we work with executive teams around the world to equip corporations with the right tools to withstand the challenge.

The Silicon Valley Innovation Center connects your company with business leaders from the world's most innovative regions. When businesses face digital disruption and rapid technological change, we provide education, intelligence and guidance to stay ahead of the competition.

WHAT IS A DIGITAL TRANSFORMATION?

Digital Transformation is one of the most overused and cryptic phrases in the modern corporate world. We simplify it by defining it as a set of changes companies are making to stay competitive using digital tools.

In our experience those changes are applicable to three categories: people, processes and technologies. Changes in those categories result in higher revenue, lower expenses and better relationships with regulators.

Digital transformation is not new, but **COVID-19** has made it more pressing as organizations strive to improve their agility, speed, and data-driven decision-making.

Here, at **SVIC**, we specialize in starting and accelerating the corporate digital transformation journey by using battle-tested approaches, best minds in Silicon Valley and cutting edge research intelligence.

DIGITAL

WHY DOES DIGITAL TRANSFORMATION MATTER?

Business success has always been driven by quality and caliber of people, but recent technological advancements are potentially as influential as the changes brought on by the Industrial Revolution. The importance of digital transformation cannot be overstated.

Main benefits that we see our customer realize from digital transformation:

Better employee experience and overall returns on human capital investment.

Organizational flexibility that is faster and better in responding to the ever-changing environment.

Detailed understanding and more complete engagement with existing and potential customers.

Transparency and trust in the company operations that drive better decision-making.

Artificial intelligence and Robotic Process Automation can work 24/7 without compensation, raises or arbitration.

GET THE ANSWERS YOU SEEK ON THE DT JOURNEY TO:

- **Adopt Digital Technologies to Transform Your Business**
- **Replace Your Legacy Systems With The Latest Digital Solutions**
- **Turn Your Data Into Digital Product And Services**
- **Use Network Effects to Become a Digital Platform**
- **Empower Your People to Drive the Change**
- **Reduce Human Costs And Automate Your Process**
- **Unleash New Types of Innovation And Creativity**
- **Create Disruptive Products And Business Models**

SEVEN ELEMENTS OF DIGITAL TRANSFORMATION SUCCESS

Delivered by top practitioners from Silicon Valley

Get inspiration, knowledge, and connections to adopt the latest technologies, leverage new business models, avoid costly mistakes and facilitate internal transformation.

ELEMENT 1

LEADING DIGITAL TRANSFORMATION EXECUTIVE PROGRAM

What digital transformation means for your company.

One of the most difficult things about digital transformation is the fact that there is no one, universal definition of what it is. Ask 10 CEOs, CTOs or CIOs what it means to their business, and you will get a different answer every time. We provide a one-of-a-kind opportunity to learn about the latest trends in digital transformation, directly from the 20 Silicon Valley business leaders. Our custom program is an immersive experience with the most innovative Silicon Valley companies. It is designed specifically for corporate executives leading digital transformation initiatives.

SUCCESS

ELEMENT 2

EVALUATE YOUR CURRENT CAPABILITIES

Once you've determined why you need to digitally transform your business and what steps to take, you should assess your current digital capabilities. Examine your tech stack, technologies, and employees; anything and everything that makes your business today should be taken into account.

Engage experts with real-life work experience from Silicon Valley

Silicon Valley Innovation Center assists you in engaging Silicon Valley experts with a proven track record to help you examine your tech stack, technologies, and employees.

Our experts are not consultants; they are successful practitioners from leading technology companies. Unlike traditional consultants, they will continue to collaborate with you after the project is completed. They are the most experienced strategic advisors in Silicon Valley, and they will bring a new and fresh perspective on how to make smart, strategic decisions in the context of the current technological ecosystem.

ELEMENT 3

ESTABLISH HOW YOU WILL GO DIGITAL

You'll be in a good position to evaluate the various digital transformation options available to you once you've established your objective and capabilities.

Consult with Top Silicon Valley Innovator's on Strategy Formulation and Execution

Your strategy may be a combination of internal and external projects or just one small change. We help you develop and implement realizable & measurable goals adding value to your customers and your business.

Technology Consulting - Quickly Identify the Best Technology Solutions for Your Goals

As new technologies appear faster than ever, companies face the increasingly complex task of choosing the right ones. Technology consulting offers expert guidance on where and how different technologies can be applied to generate maximum business value. With our help, corporations can quickly identify technology solutions for most pressing challenges.

Startup Scouting- Find The World's Best Startups and Grow Your Digital Transformation Portfolio

We conduct a customized global startup search, delivering you the companies with the greatest potential to impact your business. Engage startups, learn from them, amp up your innovation efforts, and stay ahead of disruption.

Technology Scouting - Find The Technologies That Will Define The Next Decade Of Your Industry

General public do not know the entrepreneurs and scientists who are building technologies that will disrupt industries in a decade. They do not post YouTube videos, they do not advertise, and they do not accept cold calls. But our business analysts and PhD researches talk to them almost every day.

ELEMENT 4

MAKE A COMMITMENT ACROSS THE BOARD

Once you've developed a digital transformation strategy and find solutions, it's critical to build an executive support. This project rectifies corporate commitment to digital transformation, gets your project up & running, and ensuring proper resources.

Silicon Valley Board of Directors Inspiring Tour

Bring your corporate board to Silicon Valley to open their mind to new business paradigms in the digital world. Meet the leaders in technology and startups who will help you define strategic growth and competitive directions for your company. See what innovation is being born today that will disrupt the world tomorrow.

ELEMENT 5

CREATE A ROADMAP WITH SILICON VALLEY EXPERTS

You need to look at your digital transformation plan practically and build an effective roadmap with the right strategy and buy-in. You can't change everything at once, and you'll need a detailed plan for how your transformation will work.

What will you change first, what will have the most impact and value, and what is an unavoidable impediment to progress? It is critical to create a roadmap that specifies when key changes should and must occur, how your business will gradually change, and what your digital transformation will look like over time.

Get access to the best minds in your focus area

Engage top experts with real-world work experience and a proven track record of success from Silicon Valley's most innovative companies to assist you in implementing your transformation agenda. Take advantage of our experts' deep knowledge and broad industry experience on topics ranging from digital transformation best practices to creating amazing customer experiences, from artificial intelligence applications to inspirational talks on innovation culture. We put you in touch with experts through live webinars, online Q&A sessions, and other formats. Access the best of Silicon Valley completely remotely, with no need for travel.

ELEMENT 6

SKILLS GAPS AND CROSS-FUNCTIONAL TRAININGS

Introducing new technologies, tools, and processes will have almost no impact on how an organization operates unless employees understand and are comfortable with them. The best team to lead the change should represent the entire organization.

Cross-Functional Training Programs

These training programs are high-impact learning experiences that delve into the emerging trends and disruptive technologies of a variety of industries. Choose from the list of topics below, or tell us about your field, and we'll create a customized agenda for your team.

Prepare the entire business

Communicating your plan and vision for the company is just as important as coming up with the strategy. Successful digital transformation is as much contingent on a cultural change within a business as it is a technological change. We will help you to get everyone excited.

ELEMENT 7

START YOUR DIGITAL TRANSFORMATION

Starting your digital transformation is fairly simple - begin executing! Stay committed throughout the process; companies that have successfully completed digital transformations have focused on their end vision and worked towards bridging the gap between enterprise success and growth.

**You can always rely
on SVIC for guidance
and assistance!**

BENEFITS THAT YOU CAN GET WITH US IN ONE PLACE

Network

FREE Access to the Silicon Valley Innovation Private Social Network

- Unlimited Access to Community Groups
- Access to SVIC's vault of programs
- Weekly live online training & workshops

Corporate Training

Individually tailored programs for your talent development led by our network of Silicon Valley experts

WHAT OUR CLIENTS SAY

"It's been a great week, and a fantastic program focused on Silicon Valley innovation and specifically innovation in AgriTech. Great learnings, great insights, and great fun. We had a great time and really had our minds opened to the full range of opportunities to improve our business."

Andrew Crane
CEO, CBH Group, Australia

"The week in Silicon Valley exceeded my expectations. We were able to feel, touch, and have a real look at what the future will look like. The people we met were so competent, transparent. The program was a unique opportunity for us to have a 360 degree of what is going on in our industry and what we can expect in the next 18-20 months."

Denis Gorteman
CEO at D'leteren Auto, Belgium

"Exciting, stimulating, challenging times. The key mix for generating growth is inventive minds, immersed in the leading state of technology, and experienced, but not blinkered management."

Graeme Chipp
Managing Director/CEO,
Growth Solutions Group

"We've been to IBM and Google: incredible operations, we learned a lot from and very smart, smart people, the enormity of operations is incredible. What I would take back – the future and technologies we really need to embrace this technology. Thank you."

Geoff Arnold
Business Manager, Berwick
Jaguar Land Rover, Australia

"We came across this program from SVIC. I was not sure what I was going to get through the program, but I intended to learn more about Silicon Valley ecosystem. We are on the 5th day of the program, and I am completely enjoying it. Lots of takeaways that I will use and can apply for my company. It was a very diversified program: I got access not only to practitioners but people from the academic field as well. We got to know Silicon Valley thought technology thought leaders that shared with us first-hand insights, access to the right people, and new technologies that are coming. I enjoyed the program and would recommend it to individuals who are not from Silicon Valley and want to get a very compact overview of what is going on in Silicon Valley."

Anand Shiralkar

Founder and CEO of Vizitech Solutions, India

"I think it's important to be in the center of it talking to people because your mind starts to be creative and then you have different questions than if you just sit down and watch"

Rasmus Lynge

Group Executive Vice President / Chief Customer Officer Alm Brand, Denmark

"Thank you for your great job. The program was very well designed and executed: bringing different elements of Silicon Valley innovation culture, meetings, company visits, and startup showcases. The key takeaway of the program: understand how can startups and corporates work together and create partnerships where both sides can benefit."

Fouad Alnazawi

Managing Director at Lamarka Consulting Services, Saudi Arabia

This week we spent with our business partners from Germany and Austria in California. I think it was an awesome experience and it was nice to see the Silicon Valley startup ecosystem. One of the key takeaways for me is how ideas are born in Silicon Valley, and how they are taken into curation and executed. It will be very interesting to see how we can bring this new startup mentality and scale it to a replicable business model. Visiting such companies as Google and LinkedIn is always inspiring. I would recommend everybody to make this trip because it opens your eyes and mind.

Abeer Khedrt

Information Security Director at National Bank of Egypt, Egypt

"We were able to meet with big giant tech companies, we were able to have deep dive discussions, and we also had a chance to meet FinTech startups that offer smart solutions to some of the banking problems that we faced. So far it's been a good experience and we are looking forward to the coming days. Thank you."

Rinse Tamsma

SVP at SAP, Germany

Thank you SVIC. During the past two days of the program, we got some insights and visited many companies. What I appreciate a lot – is a mix of different experiences and visiting innovative companies to see how they are physically organized to inspire innovation.

Philippe Mah

Managing Director of Manufacturing,
Toyota Material Handling, France

"We wanted to come to Silicon Valley and learn how companies innovate. We didn't know how to do it, so we approached Silicon Valley Innovation Center that managed to connect us to numerous Silicon Valley organizations that opened our eyes to what is possible."

Mathew Regan

General Manager – Corporate
Services, CBH Group, Australia

I came here to Silicon Valley to explore innovation and new ideas, specifically around logistics and operations. It's been a really interesting trip. We have seen all types of different innovative companies, and we have been introduced into markets that define public transportation. It has been overall a great trip and learning experience.
